

Industrial IP65 Hotline Analogue Phone

IP-SLT-WP-0008

Product Description

The Industrial IP65 Hotline Analogue Phone is built for tough environments where reliability and security are essential. Housed in a rugged stainless steel enclosure, it offers exceptional durability and resistance to damage, making it ideal for high-security or industrial settings. The vandal-proof handset is reinforced with a stainless steel retractable hose and a tensile steel rope capable of withstanding over 200KG of force. Designed for simple and immediate communication, the phone automatically dials a preconfigured number when the handset is lifted, and ends the call when it's returned to the cradle. With full duplex communication, RJ11 connection, and support for external loudspeakers when powered by 12VDC, this phone is a dependable solution for emergency and service points in demanding conditions.

Physical Properties

Weight	4000g
Case Material	Stainless steel
Tensile Strength	>200KG
Dimensions (H x D x W)	250mm x 55mm x 100mm
Handset Mounting	Magnetic induction hook
Handset Material	ABS (Acrylonitrile Butadiene Styrene) & PC (Polycarbonate)
Hose	Stainless steel
Mounting	Wall mount

Power

Power Input	RJ11 or 12VDC (12VDC required if an external speaker is used)
Self Consumption	Max. 3W

Telephony Specifications

Protocol	SLT
Connection	RJ11
Wiring	Twisted pair
Voice Transmission	Full duplex communication
Hotline Dialing	Automatically dials a preconfigured number when the handset is lifted
Incoming Call	Calls are answered by picking up the handset
Hang Up	Calls end when the handset is returned to the cradle
Low Frequency Group	697-941 Hz
High Frequency Group	1209-1477 Hz
External Loudspeaker Support	Supports external speaker connection when powered by 12VDC

Environmental Standards

Rating	IP65
Storage Temperature	-40°C to 75°C
Operating Temperature	-40°C to 70°C
Humidity Tolerance	5% to 95%
